

## NIMS Training Tracker & Credentialing System

- Internet access from desktop, laptop, tablet, or smart phone.
- Easily maintained training and credentialing format suited to all responders at all levels.
- Consolidated training provider records of over 3,300 courses from a dozen federally recognized providers.
- Recognizable academic format: Students, Principals, Administrators, and Coordinators repeating the Incident Command core structure.
- Learning Plan course selection optimization to achieve specific credentials for each Student.
- Operational report generation to summarize credentials, transcripts, and Learning Plans for each responder and team.
- Intuitive program navigation.
- Data security enabled with double verification protocols.
- Serving as a missing-link for Credentialing purposes by compiling course completions from all providers.
- Reducing data management time requirements, instilling a sense of responsibility, accuracy, and accountability.
